**Admission application terms for this plan:** Spring: Y Summer: Y Fall: Y

**Plan admission types:**

Freshman: Y Transfer: Y Readmit: Y Graduate: N

Non Degree Certificate (UCRT only): N

Other (For Community Campus specifics): N

**Plan Taxonomy:** 51.2212, Behavioral Aspects of Health.
Program Length Type: Program Length Value: 0.00

Report as NSC Program:

SULA Special Program:

**Print Option:**

- Diploma: Y  Undergraduate Minor, Addiction and Substance Use
- Transcript: Y  Undergraduate Minor, Addiction and Substance Use

**Conditions for Admission/Declaration for this Major:**

At the declaration of this minor, a minimum cumulative GPA of 2.0 is required.

**Requirements for Accreditation:**

There are no additional requirements, other than the university requirement.

**Program Comparisons**

**University Appropriateness**

The proposed program supports the University of Arizona’s ambitions for addressing grand challenges in the areas of disease prevention and treatment. The creation of an addiction and substance use program which includes additional trainings to improve public health response to the prevention and treatment of substance use disorders is aligned with the MEZCOPTH mission to develop workforce training by integrating our faculty's research and instruction expertise, and to the 2019 Council on Education for Public Health (CEPH) accreditation criteria associated with locating, using, evaluating, and synthesizing information in the contexts in which public health professionals work.

Students completing this minor will be equipped with skills to serve in health and social service professions, working to prevent, assist, or treat individuals and communities across a spectrum of substance use involvement.

New Academic Program – Minor (Undergraduate)
CURRICULAR INFORMATION

I. MINOR DESCRIPTION:

The Substance Use minor provides a comprehensive and interdisciplinary overview of licit and illicit substances, substance use patterns, risks of use, types of substance use treatment, and disparities in access to treatment. It follows a biopsychosocial framework that emphasizes the intersection of environmental, social, psychological, biological, and pharmacological factors that contribute to substance use and substance use disorder. The three required public health courses establish this conceptual foundation, and the elective courses allow students to explore the economic, social, and psychological implications as taught from different disciplinary perspectives. These include reasons for using as well as prevention and treatment programs and policies.

II. JUSTIFICATION/NEED FOR THE MINOR:

Substance use and addiction professions are in demand and growing. This demand is the result of efforts to correct the historical undertreatment of substance use disorders and contemporary increases in substance use and overdose deaths. Efforts to prevent use, decrease harm, and expand treatment are driven by efforts to destigmatize treatment for substance use disorders (SUD), acknowledge social and environmental risk factors that contribute to substance use, mainstream SUD treatment in additional clinical care settings, and increase the number of community and public health prevention and harm reduction programs. To accomplish this work, a trained workforce needs to involve treatment and prevention experts, and adjuvant professionals like social workers, criminal justice officers, and lawmakers, etc., who understand the causes of substance use and evidence-base for effective interventions.

The current opioid crisis has added to ongoing public health concerns with tobacco, alcohol, cannabis, methamphetamine, and other substances. In the US, each year almost 500,000 people die from smoking and 95,000 from excessive alcohol use. In 2021, over 100,000 people died from drug overdose. COVID-19 has further exacerbated the conditions that increase risk of substance use and overdose deaths. Healthcare, public health, and social service organizations require professionals trained to address these large and increasing health problems. Job growth for substance abuse, behavioral disorder, and mental health counselors is growing faster than average, with 25% expected career growth between 2019 and 2025. Job growth for Community Health Workers and Educators, Social Workers, and Community Service Managers is also predicted to increase between 13 and 17% by 2025. Behavioral health positions, including patient advocate,
youth, and health education counseling are also expected to grow in Arizona and nationally, with above average wages.\(^8\)

The study of substance use does not represent a stand-alone discipline. Instead, it has been addressed as a topic in social science, health science, public health, racial/ethnic studies, legal, and other disciplines. This proposed minor acknowledges the important contributions from these varied perspectives and uses an integrative public health framework to account for the intersection of the person, their environment, and the substance. Where minor programs at other universities commonly focus more narrowly on addiction counseling, chemical dependency, or substance abuse services, our minor degree aims to provide foundational information to a broad array of future professionals. The degree emphasizes the psychological, physiological, chemical, and social elements of substance use, including how they intersect and contribute to a holistic understanding of who uses, why, and what makes them vulnerable to substance use disorder. This minor will serve those in health and social service professions, who work to prevent, assist, or treat individuals and communities across a spectrum of substance use involvement, from experimentation to high-risk use.

III. MINOR REQUIREMENTS:

<table>
<thead>
<tr>
<th>Minimum total units required</th>

</tr>
</tbody>
</table>

**REQUIRED COURSES (9 units):**
- PHPM 225 Introduction to Addiction and Substance Use (New) (3 units)
- HPS 306 Drugs and Society (3 units)
- PHPM 448 Addiction and Substance Use Policy (3 units)

**ELECTIVE COURSES (9 units):**
- HPS 442 Nicotine Dependence, Treatment, and Coaching Intervention (3 units)
- PSY 313 Drugs and the Brain (3 units)
- SERP 478 Drug Abuse and Addictions (3 units)
- FCM 496A Advancements in Substance Misuse Research & Clinical Care (2 units)
- LAS 354 Drugs and Violence in Mexico (3 units)
- LAS 348 Drug Wars and Oil Fortunes in Latin America (3 units)

---

\(^8\) Burning Glass – Market report, Behavioral Health CIP Code (51.2212)
- FCM 301 Substance Misuse in Maternal and Child Health (MCH) Populations (3 units)
- PHIL 345 Philosophy and Psychiatry (3 units)
- HUSV 430 Substance Abuse Theory and Counseling (3 units)
- PHCL 445 Drugs of Abuse (3 units)

**No more than 3 units may be selected from the following:**
- PAH 350 Health Humanities: Intercultural Perspectives (3 units)
- AFAS 444 / HPS 444 Rethinking Race and Health in the United States (3 units)
- PHIL 321 Medical Ethics (3 units)
- PCOL 406 Comprehensive Human Pharmacology (3 units)
- PHPM 310 Health Care in the U.S. (3 units)
- HPS 387 Health Disparities & Minority Health (3 units)
- EPID 309 Introduction to Epidemiology (3 units)
- HPS 350 Principles of Health Education and Health Promotion (3 units)
- HPS 404 Fundamentals of Evaluation (3 units)

V. Learning Outcomes - Complete this table as a summary of the learning outcomes from your assessment plan, using these examples as a model. If you need assistance completing this table and/or the Curriculum Map, please see the resources at the Office of Instruction and Assessment or contact them here.

<table>
<thead>
<tr>
<th>Learning Outcome #1: Define key terms and concepts related to psychoactive substance use.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Concepts</strong>: Students will demonstrate knowledge of substance use and addiction concepts learned in core courses.</td>
</tr>
<tr>
<td><strong>Competencies</strong>: Students will demonstrate knowledge of the pharmacological, neurobiological, psychological, health behavior, and social environmental factors that contribute to substance use.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Learning Outcome #2: Explain the biopsychosocial view of substance use and substance use disorder.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Concepts</strong>: Students will integrate concepts learned from multiple disciplines to explain substance use and substance use disorder.</td>
</tr>
<tr>
<td><strong>Competencies</strong>: Students will use multiple perspectives to make connections across disciplines that contribute to the onset and treatment of substance use disorder. This will include the ability to identify populations at higher risk for substance use and that experience differential harm from use.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Learning Outcome #3: Evaluate a substance use prevention or treatment policy or practice.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Concepts</strong>: Students will apply substance use concepts learned in core and elective courses to evaluate prevention and treatment policies and practices.</td>
</tr>
<tr>
<td><strong>Competencies</strong>: Students will critique policies and practices that aim to prevent substance use or treat substance use disorder. These may include health prevention philosophies like abstinence and harm reduction and how treatment systems are structured and regulated.</td>
</tr>
</tbody>
</table>

3. How do these differences make this program more applicable to the target student population and/or a better fit for the University of Arizona?

The proposed undergraduate minor in Addiction and Substance Use draws upon the strengths of MEZCOPH faculty’s expertise in substance misuse policies and treatment services, as well as health education and treatment program implementation and evaluation. With the demand for addiction and substance abuse professionals continuing to climb nationwide, this minor will complement a variety of majors and enhance student’s career opportunities within this growing field.
Dear Danielle Embry,

The Africana Studies Program enthusiastically supports your proposal for the new undergraduate minor Addiction and Substance Use. We also approve for our course AFAS/HPS 444 Rethinking Race and Health in the United States to count as a possible elective in the minor.

I confirm availability to accommodate additional students within this course. Please note that we usually offer AFAS 444 once every three semesters on average.

In addition, students pursuing this new minor may be interested in taking HUMS 150B1 Mind-Altering Substances in the Ancient World as part of their general education requirements.

Finally, here are other courses offered in the College of Humanities that could be of interest:

- CLAS 313 Health and Medicine in Classical Antiquity
- HUMS/CFA 200 Health, Culture, and Creativity: Foundations in Health Humanities and the Arts
- HUMS 378 Playing Doctor: Images of Medicine and Health in Film
- PAH 350 Health Humanities: Intercultural Perspectives
- RELI 303 Spirituality and Sickness: Religion and Health in the U.S.

Let me know if you have any questions.

Best wishes,

Sincerely,

Praise Zenenga, Ph.D.

Program Director and Associate Professor
Africana Studies Program, University of Arizona
September 20, 2021

To whom it may concern,

This letter is to confirm the support of the Department of Family and Community Medicine in the College of Medicine – Tucson, for including FCM 496A Advancements in Substance Misuse Research & Clinical Care and FCM 301 – Substance Misuse in Maternal and Child Health (MCH) Populations in the proposed Addiction and Substance Use minor. We anticipate no difficulties in accommodating additional students in these courses.

Sincerely,

Ann C. Mathias

Clinical Assistant Professor
Department of Family and Community Medicine

Cc: Alicia Marie Allen, PhD, MPH
To whom it may concern,

This letter is to confirm the support of the Center for Latin American Studies for the proposed Substance Use minor by the College of Public Health. We are glad to include LAS 354 – Drugs and Violence in Mexico and LAS 348 – Drug Wars and Oil Fortunes in Latin America in the elective course offerings. We anticipate no difficulties in accommodating additional students in either of these courses.

Please feel free to contact me with any questions or for more information. We look forward to collaborations with students and faculty from the new minor!

Sincerely,

Colin Deeds

Melanie,

I have worked with Ben Brady to refine the learning outcomes, concepts, and competencies for the Substance Use Minor proposal that he will be submitting.

Ben,

I suggest some rewording to the Concepts and Competencies to avoid "understand" and, hopefully, pass the Regents' scrutiny. If you are fine with these changes, I'll send you an email confirming that I have reviewed your proposal, with a copy to Melanie.

Hi Ingrid,

Last year, you helped me review learning outcomes and create an assessment map as part of an undergraduate minor proposal. We submitted the proposal last month and curricular affairs provided feedback asking that we provide documentation that our learning outcomes and assessment plan were coordinated with OIA and received your approval.

Since we worked together, the learning outcome table in the proposal has been expanded to include concepts and competencies, so these were not part of your initial review last year. Would you be able to assist me again in reviewing the updated learning outcomes, or would you be able to refer me to someone within your office who provides this support?

The updated proposal is attached with track change comments from Melanie Madden, Curricular Affairs Program Manager.

Thank you,

Ben

Ben,

I agree that using the required courses as places to collect assessment findings makes sense, as those are courses over which you have control.

The Curriculum Map that you have included in the proposal lists eight outcomes, which is way too many for a minor. For undergrad programs, we recommend no more than five, so a good number for a minor would be two or three. And your map doesn’t include assessment points for two of the outcomes. I suggest that you focus on more general outcomes that reflect what you expect students to know and be able to do at the end of the minor; these outcomes would presume mastery of the more fine-grained outcomes that you have provided.

Ingrid

Hi Ingrid,

I have attached the New Academic Program Add. Info Form for the Substance Use minor we are developing. The plan is for the minor to be housed in the College of Public Health. There are three required courses (9 units), all public health, and the remaining units are from courses across campus. I based my draft of the degree learning outcomes and assessment plan only on the courses that are required. Please let me know if you recommend a different approach.

Thank you,

Ben

Ben,

Thanks for reaching out to OIA with your question. I am happy to create a Curriculum Map to be included in your undergraduate minor program proposal. (Since we don’t require regular assessment reporting in minors, it’s much faster for me to do that than for you to learn a system you’ll not need to use again.)

If you can send me the table from your proposal that lists the learning outcomes and assessment points, I can create the Map. I will also provide feedback on your outcomes and assessment plan, as Curricular Affairs has asked us to do this for all new program proposals.

Hi,

I am completing a new academic program - undergraduate minor information form, and I need to create a Student Learning Outcomes and Curriculum MAP using Taskstream. I don’t have any experience with this, is it a tool you can provide me access to use, and/or would it be possible to meet and review the process with a member of your team?

Thank you,
Ben Brady
Hi Danielle and Benjamin:

The Department of Public & Applied Humanities wholeheartedly supports this great new undergraduate minor, and we can accommodate additional students in PAH 350 (Health Humanities: Intercultural Perspectives). Please consider this email our letter of support.

Best of luck with the proposal!

Cheers,

Judd Ruggill
Head | Department of Public & Applied Humanities

Dear Dr. Ruggill,

My name is Danielle Embry and I coordinate curriculum for the College of Public Health. I’m writing on behalf of Dr. Benjamin Brady (cc’d here) to introduce our proposal for a new undergraduate minor—Addiction and Substance Use. The proposed minor would be located in the Zuckerman College of Public Health, and include nine required public health course units and nine elective units from up to 12 departments. Among the electives, we ask your support to include PAH 350 – Health Humanities: Intercultural Perspectives.

Our vision for the minor is to provide students a public health perspective on addiction and substance use that incorporates the intersection of biological, psychological, and social-environmental factors. The required public health courses (200-level introductory course, 306 Drugs and Society, 448 Addiction and Substance Use Policy) are designed to establish this framework. The elective courses would provide a multidisciplinary menu of content-specific options to compliment and fit within it.

If your department supports this request, we kindly request a letter of support that confirms your availability to accommodate additional students within this course.

Thank you for your time. Please reach out with any questions.
Sincerely,

B. Brady
