THE UNIVERSITY OF ARIZONA®

New Academic Program Workflow Form

General

Proposed Name: Science

Transaction Nbr: 0000000000172

Plan Type: Major

Academic Career: Undergraduate

Degree Offered: Bachelor of Arts

Do you want to offer a minor? N

Anticipated 1st Admission Term: Fall 2023

Details

Department(s):

SCNC

DEPTMNT ID	DEPARTMENT NAME	HOST
0442	Science Administration	Y

Campus(es):

ONLN

LOCATION	DESCRIPTION
ONLN	Online

Admission application terms for this plan: Spring: Y Summer: Y Fall: Y

Plan admission types:

Freshman: Y Transfer: Y Readmit: Y Graduate: N

Non Degree Certificate (UCRT only): N

Other (For Community Campus specifics): N

Plan Taxonomy: 30.0101, Biological and Physical Sciences.

Program Length Type: Program Length Value: 0.00

Report as NSC Program:

SULA Special Program:

Print Option:

Diploma: Y BA in Science

Transcript: Y BA in Science

Conditions for Admission/Declaration for this Major:

2.0 GPA

Requirements for Accreditation:

None

Program Comparisons

University Appropriateness

This proposed degree aligns with the UArizona strategic pillars:

1. Wildcat Journey, preparing students with the skills and mindsets to lead in the 4th Industrial Economy

2. Arizona Advantage, advancing our land grant mission to drive social, cultural, and economic impact

The proposed degree will add value to degrees in such fields as education, law, journalism, business, development, economics, management, humanities, etc.) so students in these fields are better prepared to apply their knowledge to the challenges of today. The degree thus prepares students with a foundation in science that will enable them to drive social, cultural, and economic change. Students will obtain an appreciation for scientific knowledge, laying a foundation for critical thinking. Additionally, understanding of science factors fundamentally into the background and mindset necessary for students to address challenges of the 4th Industrial Economy.

Peer Comparison

The University of Arizona offers the following degrees with some similarity to the proposed BA in Science: the 1) Bachelor of Interdisciplinary Studies-Emphasis in Science, Technology, Health and Society, 2) BA in Applied Humanities-Medicine, 3) BA in Applied Humanities-Public Health. The main similarity with the Bachelor of Interdisciplinary Studies-Emphasis in Science, Technology, Health and Society and the proposed BA is that both degrees provide students with STEM instruction. The main differences are that students in the proposed BA take M-strand moderate math requiring precalculus whereas the BIS only requires G-strand general math. Additionally, students in the proposed BA obtain more extensive instruction in science through 100- and 200-level requirements and upper electives in science. The BAs in Applied Humanities also only require G-strand math and further require no science courses.

Other Support

Other Support Currently Available:

Science Administration

Other Support Needed over the Next Three Years:

The proposed BA in Science requires no additional faculty or infrastructure but will require an advisor for student support and a program manager to administer the program. The associate dean for undergraduate student success in the college of science will oversee hiring these personnel.

Comments During Approval Process

1/20/2023 4:29 PM

MELANIECMADDEN Comments Approved.

To be used once the preliminary proposal has been approved.

I. MAJOR REQUIREMENTS-

UNDERGRADUATE

Total units required to complete the degree	120
Upper-division units required to complete the	42
degree	
Foundation courses	
Second language	4th Semester Proficiency
Math	Moderate: M-Strand
General education requirements	Entry course/1 unit – UNIV 101
	4 courses/12 units: Exploring Perspectives (one course from each domain
	required)
	- Humanist
	- Artist
	- Social Scientist
	- Natural Scientist
	3 courses/9 units: Building Connections
	Exit course/1 unit – UNIV 301
Pre-major? (Yes/No). If yes, provide requirements.	No
Provide email(s)/letter(s) of support from home	
department head(s) for courses not owned by	
your department.	
List any special requirements to declare or gain	No special requirements
admission to this major (completion of specific	
coursework, minimum GPA, interview,	
application, etc.)	
Major requirements	
Minimum # of units required in the major (units	42
counting towards major units and major GPA)	

Minimum # of upper-division units required in the	16
major (upper division units counting towards	
major GPA)	
Minimum # of residency units to be completed in	18
<u>the major</u>	
Required supporting coursework (courses that do	Complete 1 of the following:
not count towards major units and major GPA but	-Math 113 (3) Elements of Calculus
are required for the major). Courses listed must	-Math 122A (1) Functions of Calculus & Math 122B (4) First semester
include prefix, number, units, and title. Include	Calculus
any limits/restrictions needed (house number	-Math 125 (3) Calculus
limit, etc.).	
Major requirements. List all major requirements	Core Courses
including core and electives. If applicable, list the emphasis requirements for each proposed	Statistics Requirement. (3 units) Complete 1 of the following:
emphasis*. Courses listed count towards major	-Math 163 or 263 (3) Basic Statistics or Intro to Statistics and Biostatistics -PSY 230 (3) Psychological Measurement and Statistics
units and major GPA. Courses listed must include	
prefix, number, units, and title. Mark new	Core Science Requirement. (16 units) Complete 4 of the following (complete
coursework (New). Include any limits/restrictions	at least one course from each of biology, chemistry, and physics):
needed (house number limit, etc.). Provide	-MCB 181 R/L (4) Introductory Biology I with lab
email(s)/letter(s) of support from home	-ECOL 182 R/L (4) Introductory Biology 2 with lab
department head(s) for courses not owned by	-CHEM 141 & 145 (4) General Chemistry 1: Quantitative Approach with lab
your department.	-CHEM 142 & 146 (4) General Chemistry 2: Quantitative Approach with lab
	-PHYS 102 & 181 (4) Introductory Physics 1 with lab
	-PHYS 103 & 182 (4) Introductory Physics 2 with lab
	Or
	-PHYS 141 (4) Introductory Mechanics
	-PHYS 241 (4) Introductory Electricity and Magnetism
	-PHYS 242 (4) Introductory Relativity and Quantum Mechanics
	Additional Science Requirement (7 units). Complete 2 of the following:
	-NSCS 200 (3) Fundamentals of Neuroscience & Cognitive Science
	-PSY 101 (4) Introduction to Psychology

ONA	-
	Capstone Requirement (1 unit)
	-SCI 401 (1) Science Capstone
	<u>Upper division electives (15 units)</u> Students take at least 3 courses in one area and the remaining 2 courses from any of those listed below for a total of 5 upper division electives. Example areas are listed below. An area may also be a grouping of classes from a single STEM department.
	Psychology -PSY 300 (3) Cognitive Neuroscience: A Guide to Mind and Brain -PSY 340 (3) Introduction to Cognitive Development -PSY 352 (3) Personality -PSY 360 (3) Social Psychology -PSY 381 (3) Abnormal Psychology -PSY 383 (3) Health Psychology -PSY 324 (3) Fundamentals of Aging -PSY 412 (3) Animal Learning -PSY 480 (3) Forensic Psychology
	Earth Systems and Sustainability -ATMO 336 (3) Weather, Climate, and Society -HWRS 349A (3) Principals of Hydrology -HWRS 349B (3) Principals of Hydrology Lab -ATMO 436A (3) Weather Fundamentals
	Genetics, Cell, and Molecular Biology -ECOL 320 (4) Genetics -ECOL 326 (3) Genomics -MCB 404 (3) Bioethics -MCB 410 (3) Cell Biology -MCB 411 (3) Molecular Biology -MCB 422 (3) Problem Solving with Genetic Tools

_	ONA	
		Ecology, Evolution, and Animal Behavior -ECOL 406R (3) Conservation Biology -ECOL 437 (4) Vertebrate Physiology -ECOL 485 (4) Mammalogy -ECOL 487R (3) Animal Behavior -ECOL 487L (1) Animal Behavior Lab -ECOL 488 (4) Arizona Mammals
		Biochemistry ~CHEM 241A (3) Organic Chemistry Lecture I -CHEM 241B (3) Organic Chemistry Lecture 2 -BIOC 384 (3) Foundations in Biochemistry -BIOC 385 (3) Metabolic Biochemistry (~required for the remaining 3 courses in this grouping)
		 Neuroscience *NROS 307 (3) Cellular Neurophysiology *NROS 310 (3) Molecular and Cellular Biology of Neurons *NROS 418 (3) Fundamental Principles of systems Neuroscience -NROS 308 (3) Methods in Neuroscience -NROS 330 (3) Principles of Neuroanatomy: Cells to Systems -NROS 430 (3) Neurogenetics -NROS 440 (3) How to build a Brain: Mechanisms of Neural Development (*recommended courses)
		Cognitive Science -NSCS 320 (3) Issues and Themes in Cognitive Science -CGSC 344 (3) Modeling the Mind: Computational Models of Cognition -CGSC 310 (3) Multisensory Perception -PSY 300 (3) Cognitive Neuroscience: A Guide to Mind and Brain (note: students may count this course toward one grouping only)
	Internship, practicum, applied course requirements (Yes/No). If yes, provide description.	No
	Senior thesis or senior project required (Yes/No).	No
	If yes, provide description.	

To be used once the preliminary proposal has been approved.

ONA	
Additional requirements (provide description)	None
Minor (specify if optional or required)	None required
	None required
Any double-dipping restrictions (Yes/No)? If yes,	Up to 9 units may double dip with general education requirements
provide description.	

CURRENT COURSES-

Course prefix and number (include cross- listings)	Units	Title	Pre-requisites	Modes of delivery (online, in- person, hybrid)	Typically Offered (F, W, Sp, Su)	Dept signed party to proposal? (Yes/No)
MATH 263	3	Introduction to Statistics and Biostatistics	Placement or completion of MATH 108, 112, 113, 116, 119A, 122B, or 125 in the last year	Online	F,Sp,Su	Yes
PSY 230	3	Psychological Measurement and Statistics	PSY 101 or PSY 150A1	Online	F,Sp,Su	Yes
MCB 181R/L	4	Introductory Biology 1 with lab	placement	Online	F,Sp,Su	Yes
ECOL 182R/L	4	Introductory Biology 2 with lab	placement	Online	Fall (7W1 & 7W2), Spring (7W1 & 7W2), Summer (5W1 & 5W2)	Yes
CHEM 141	3	General Chemistry 1: Quantitative Approach	placement	Online	F,Su	Yes

PHYS 241	4	Introductory Electricity and Magnetism	PHYS 141, CR, MATH 223	Online	F,Sp	Yes
PHYS 242	3	Introductory Relativity and Quantum Mechanics	PHYS 141, PHYS 142, PHYS 241 or OPTI 226	Online	F,Sp	Yes
NSCS 200	3	Fundamentals of Neuroscience & Cognitive Science	MCB 181R and PSY 101 or equivalent	Online	F,Sp	Yes
PSY 101	4	Introduction to Psychology	None	Online	F,W,Sp, Su	Yes
PSY 300	3	Cognitive Neuroscience: A Guide to Mind and Brain	None	Online	F,W,Sp, Su	Yes
PSY 340	3	Introduction to Cognitive Development	PSY 101 or PSY 150A1	Online	F,Sp,Su	Yes
PSY 352	3	Personality	PSY 101 or PSY 150A1	Online	Sp,Su	Yes
PSY 360	3	Social Psychology	PSY 101 or PSY 150A1	Online	Fa,Su	Yes
PSY 381	3	Abnormal Psychology	PSY 101 or PSY 150A1	Online	Sp,Su	Yes
PSY 383	3	Health Psychology	PSY 101 or PSY 150A1	Online	Fa,Su	Yes
PSY 324	3	Fundamentals of aging	PSY 101 or PSY 150A1	Online	Fa	Yes
PSY 412	3	Animal Learning	PSY 101 or PSY 150A1	Online	Sp	Yes
PSY 480	3	Forensic Psychology	PSY 101 or PSY 150A1	Online	Sp	Yes
ATMO 336	3	Weather, Climate and Society	None	Online	Fa, Sp, Su	Yes
HWRS 349A	3	Principals of Hydrology	MATH 122B or MATH 125	Online	Fa	Yes
HWRS 349B	3	Principals of Hydrology Lab	MATH 122B or MATH 125.	Online	Fa	Yes
			Have previously taken HWRS 249A or concurrent			

			enrollment in HWRS 249A.			
			Department permission			
			required.			
ATMO 436A	3	Weather Fundamentals	MATH113 or MATH 122B and	Online	Sp	Yes
			physics background (high			
			school physics suffices)			
ECOL 320	4	Genetics	MCB 181R and MCB 181L or	Online	Fall (7W1),	Yes
			consent of instructor.		Spring (7W1),	
					Summer	
					(5W1 & 5W2)	
ECOL 326	3	Genomics	ECOL 182R and ECOL 182L	Online	Fall (7W2)	Yes
MCB 404	3	Bioethics	One year of college-level	Online	F,Sp,Su	Yes
			introductory biology; botany			
			not acceptable.			
MCB 410	3	Cell Biology	Not an MCB BS major. MCB	Online	Fa,Su	Yes
			181R, MCB 181L, ECOL 182R,			
			ECOL 182L.			
MCB 411	3	Molecular Biology	Not an MCBBS major.	Online	Sp,Su	Yes
			Prerequisites MCB 181R,			
			MCB 181L.			
MCB 422	3	Problem Solving with Genetic	MCB 181R and 181L.	Online	Su	Yes
		Tools				
ECOL 406R	3	Conservation Biology	ECOL 182R and ECOL 182L	Online	Summer	Yes
					(during 5W1	
					OR 5W2)	
ECOL 437	4	Vertebrate Physiology	ECOL 182R and ECOL 182L	Online	Spring (7W1)	Yes
ECOL 485	4	Mammalogy	ECOL 182R and ECOL 182L	Online	Fall (7W2)	Yes
ECOL 487R	3	Animal Behavior	ECOL 182R and ECOL 182L	Online	Fall OR Spring	Yes
					(during 7W1	
					OR 7W2)	
ECOL 487L	1	Animal Behavior Lab	ECOL 182R and ECOL 182L	Online	Fall OR Spring	Yes
					(during 7W1	
					OR 7W2)	

ECOL 488	4	Arizona Mammals	ECOL 182R and ECOL 182L	Online	Summer (during 5W1 OR 5W2)	Yes
CHEM 241A	3	Organic Chemistry Lecture I	CHEM 105B, CHEM 142, CHEM 152 or CHEM 162.	Online	F,Su	Yes
BIOC 384	3	Foundations in Biochemistry	Undations in Biochemistry CHEM 152 or CHEM 142 or CHEM 152 or CHEM 105B or CHEM 162) and (CHEM 241A or CHEM 242A or CHEM 246A). BIOCBA and BIOCBS Students may not enroll.			
BIOC 385	3	Metabolic Biochemistry	MCB 181R and (CHEM 142 or CHEM 152 or CHEM 105B or CHEM 162) and (CHEM 241A or CHEM 242A or CHEM 246A). BIOCBA and BIOCBS Students may not enroll.	Online	F,W,Sp,Su	Yes
CHEM 241B	3	Organic Chemistry Lecture II	CHEM 241A or CHEM 242A or CHEM 246A.	Online	F,Su	Yes
NROS 307	3	Cellular Neurophysiology	MCB181R , CHEM 151 with lab.	Online	F,Sp	Yes
NROS 308	3	Methods in Neuroscience	Prerequisite or concurrent enrollment in NSCS 307.	Online	F,Sp	Yes
NROS 310	3	Molecular and Cellular Biology of Neurons	NSCS 200	Online	F,Sp	Yes
NROS 418	3	Fundamental Principles of Systems Neuroscience	None	Online	F,Sp	Yes
NROS 330	3	Principles of Neuroanatomy: Cells to Systems	NSCS 200 and prerequisite or concurrent enrollment in NROS 307. Other courses may be accepted at the discretion of instructor.	online	F,Sp	Yes
NROS 430	3	Neurogenetics	MCB 181R (required), NROS 310 (recommended).	Online	F,Sp	Yes

To be used once the preliminary proposal has been approved.

NROS 440	3	How to Build a Brain: Mechanisms	Online	F,Sp	Yes	
NCCC 220	2	of Neural Development	NGCC 200	Quiling	E. C.	
INSUS 320	3	Issues and Themes in Cognitive	NSCS 200	Unline	ға, эр	res
		Science				
CGSC 344	3	Modeling the Mind:	NSCS 200	Online	Fa,Sp	Yes
		Computational Models of

V. Curriculum Map and Assessment Map - Complete this table as a summary of your learning outcomes and assessment plan, using these examples as a model. If you need assistance completing this table and/or the Curriculum Map, please contact the Office of Instruction and Assessment. Attach your Curriculum Map here.

Program: BA Science

Learning Outcome #1: Demonstrate foundational knowledge of the c	discipline (Basic Knowledge).

Concepts: core knowledge of the discipline

Competencies: Students will demonstrate understanding of the theories, fundamental principles, and concepts of the discipline.

Assessment Methods: This outcome will be assessed in participation in online discussions, exams, assigned readings, and discussion questions.

Measures: Direct measures include evaluation of homework, exams, papers, reports, or other student projects. Indirect measures will include student self-assessments via surveys and reflections

Learning Outcome #2: Apply modern and/or relevant laboratory skills and protocols to collect and analyze data (Laboratory Skills).

Concepts: laboratory skills and protocols for collecting and analyzing data

Competencies: Students will use quantitative skills to 1) collect data using the tools of the discipline and 2) analyze the data.

Assessment Methods: This outcome will be assessed across several different laboratories the student takes.

Measures: Direct measures include Instructor grading of lab reports. Indirect measures will include student self-assessments via surveys and reflections

Learning Outcome #3: Communicate knowledge, ideas, and reasoning clearly, effectively, and objectively in written and oral forms (Communication Skills).

Concepts: communicate effectively, reason clearly, write and communicate objectively

Competencies: Students will demonstrate their knowledge through oral and written work

Assessment Methods: This outcome will be assessed using oral presentations and/or written papers in the capstone course

Measures: Direct measures include instructor grading of written and oral work. Indirect measures will include student self-assessments via surveys and reflections

Learning Outcome #4: Interpret data using scientific reasoning and foundational disciplinary knowledge through project-based activities and/or research projects (Scientific Reasoning and Research).

Concepts: basic experimental manipulations, analysis of data, implications of the experimental outcomes

Competencies: Students will demonstrate their ability to apply experimental methods and interpret data.

Assessment Methods: This outcome will be assessed in participation in online discussions, exams, lab reports, and discussion questions.

Measures: Direct measures include evaluation of student written work, project-based activities, or research projects. Indirect measures will include student self-assessments via surveys and reflections

To be used once the preliminary proposal has been approved.

Learning Outcome #5: Demonstrate teamwork skills by collaborating and participating with peers to produce various deliverables (e.g., data collection, data analysis, conclusions) (Teamwork).

Concepts: collaborative work, mutual respect, and shared values.

Competencies: Students will demonstrate the ability to work effectively in virtual teams by demonstrating mastery of professional skills including content knowledge, self-reflection, project-management, and teamwork.

Assessment Methods: This outcome will be assessed in classroom interaction, homework, or group projects.

Measures: Direct measures include grades of student contribution to a project. Indirect measures will include student self-assessments via surveys and reflections

VII. PROGRAM ASSESSMENT PLAN-.

Assessment Measure	Source(s) of Evidence	Data Collection Point(s)
Job Placement Statistics	Student/Alumni Survey	At graduation annually (senior exit survey)
SCI 401	Percentage of students meeting the	Annually
Senior Capstone	acceptable target for each learning	
	objective measured using class	
	assignments, reflections, presentations, and	
	reports	
Senior Exit Survey (will measure	Student Survey	At graduation annually
percentage of students rating each		
learning outcome at "Agree" or "Strongly		
Agree"		

VIII. ANTICIPATED STUDENT ENROLLMENT-complete the table below. What concrete evidence/data was used to arrive at the numbers?

5-YEAR PROJECTED ANNUAL ENROLLMENT					
	1 st Year	2 nd Year	3 rd Year	4 th Year	5 th Year
Number of	30	60	90	120	150
Students					

To be used once the preliminary proposal has been approved.

Data/evidence used to determine projected enrollment numbers:

We used enrollment rates in two comparable programs at peer institutions to anticipate program enrollment. The table below shows the total enrollment in these programs. We extrapolated a conservative value in line with the program at the University of Oregon established several years ago:

Summary of enrollments in two comparable programs at peer institutions						
University	Type of Degree	Degree Name	Total Enrollment (2022)			
University of Arizona	BIS	Bachelor of Interdisciplinary Studies—Emphasis in Science,	56			
		Technology, Health and Society				
University of Arizona	BA	BA in Applied Humanities—Medicine	48			
University of Arizona	BA	BA in Applied Humanities—Public Health	1			

IX. ANTICIPATED DEGREES AWARDED-

PROJECTED DEGREES AWARDED ANNUALLY						
	1 st Year	2 nd Year	3 rd Year	4 th Year	5 th Year	
Number of	0	9	18	27	36	
Degrees						

Data/evidence used to determine number of anticipated degrees awarded annually: We calculated a 60% graduation rate based on comparisons to similar programs at peer institutions. We also factored in students transferring into AZ Online and into the major.

X. PROGRAM DEVELOPMENT TIMELINE- describe plans and timelines for 1) marketing the major and 2) student recruitment activities.

To be used once the preliminary proposal has been approved.

All programs required for the major are already developed and delivered via AZ Online. Thus, we will not need time to develop new courses. We will work closely with the recruitment and marketing teams at Arizona Online to market the program through their marketing channels as soon as ABOR approves the degree program.

XI. Program Fees and Differential Tuition (PFDT) Request – For implementation of fees, you must work with <u>University Fees</u>. The annual deadline is December 1. For any questions, please contact the <u>University Fees Program Manager</u>.

We do not plan to propose any program fees associated with any new courses for the BA in Science program.

To be used once the preliminary proposal has been approved.

Appendix C. ABOR Form

Request to Establish New Academic Program in Arizona

Please complete all fields. Boxes may be expanded to accommodate longer responses. Clarifying field descriptions can be found below. Should you have any questions or concerns, please email Helen Baxendale, Director of Academic Affairs and Policy at helen.baxendale@azregents.edu

University: University of Arizona

Name of Proposed Academic Program: Bachelor of Arts in Science
Academic Department:
College of Science—SCNC.
Geographic Site:
Arizona Online
Instructional Modality:
online/ONLN campus
Total Credit Hours:
120
Proposed Inception Term: Fall 2023
Brief Program Description:
The B.A. in Science meets the needs of students in our AZ Online programs who wish to pair their degrees with basic
training and skills in STEM. This interdisciplinary degree program emphasizing biological and physical sciences will enhance
job opportunities for students with a strong interest in science who do not anticipate working as a professional
scientist, but instead intend to use their knowledge in an intersectional field such as education, policy, law, or
education. It will also provide basic STEM background for medical and health services managers, medical assistants, natural

will enable them to drive social, cultural, and economic change.
This proposed degree aligns with the UArizona strategic pillars:
 Wildcat Journey, preparing students with the skills and mindsets to lead in the 4th Industrial Economy Arizona Advantage, advancing our land grant mission to drive social, cultural, and economic impact
The proposed degree will add value to degrees in such fields as education, law, journalism, business, development, economics, management, humanities, etc.) so students in these fields are better prepared to apply their knowledge to the challenges of today. The degree thus prepares students with a foundation in science that will enable them to drive social, cultural, and economic change. Students will obtain an appreciation for scientific knowledge, laying a foundation for critical thinking. Additionally, understanding of science factors fundamentally into the background and mindset necessary for students to address challenges of the 4th Industrial Economy.
Learning Outcomes and Assessment Plan:
Program: BA Science
Learning Outcome #1: Demonstrate foundational knowledge of the discipline (Basic Knowledge).
Concepts: core knowledge of the discipline
Assessment Methods: This outcome will be assessed in participation in online discussions, exams, assigned readings, and discussion
Assessment Methods: This outcome will be assessed in participation in online discussions, exams, assigned readings, and discussion questions.
Assessment Methods: This outcome will be assessed in participation in online discussions, exams, assigned readings, and discussion questions. Measures: Direct measures include evaluation of homework, exams, papers, reports, or other student projects. Indirect measures will
Assessment Methods: This outcome will be assessed in participation in online discussions, exams, assigned readings, and discussion questions. Measures: Direct measures include evaluation of homework, exams, papers, reports, or other student projects. Indirect measures will include student self-assessments via surveys and reflections
Assessment Methods: This outcome will be assessed in participation in online discussions, exams, assigned readings, and discussion questions. Measures: Direct measures include evaluation of homework, exams, papers, reports, or other student projects. Indirect measures will include student self-assessments via surveys and reflections Learning Outcome #2: Apply modern and/or relevant laboratory skills and protocols to collect and analyze data (Laboratory Skills).
Assessment Methods: This outcome will be assessed in participation in online discussions, exams, assigned readings, and discussion questions. Measures: Direct measures include evaluation of homework, exams, papers, reports, or other student projects. Indirect measures will include student self-assessments via surveys and reflections Learning Outcome #2: Apply modern and/or relevant laboratory skills and protocols to collect and analyze data (Laboratory Skills). Concepts: laboratory skills and protocols for collecting and analyzing data
Assessment Methods: This outcome will be assessed in participation in online discussions, exams, assigned readings, and discussion questions. Measures: Direct measures include evaluation of homework, exams, papers, reports, or other student projects. Indirect measures will include student self-assessments via surveys and reflections Learning Outcome #2: Apply modern and/or relevant laboratory skills and protocols to collect and analyze data (Laboratory Skills). Concepts: laboratory skills and protocols for collecting and analyzing data Competencies: Students will use quantitative skills to 1) collect data using the tools of the discipline and 2) analyze the data.
Assessment Methods: This outcome will be assessed in participation in online discussions, exams, assigned readings, and discussion questions. Measures: Direct measures include evaluation of homework, exams, papers, reports, or other student projects. Indirect measures will include student self-assessments via surveys and reflections Learning Outcome #2: Apply modern and/or relevant laboratory skills and protocols to collect and analyze data (Laboratory Skills). Concepts: laboratory skills and protocols for collecting and analyzing data Competencies: Students will use quantitative skills to 1) collect data using the tools of the discipline and 2) analyze the data. Assessment Methods: This outcome will be assessed across several different laboratories the student takes.
Assessment Methods: This outcome will be assessed in participation in online discussions, exams, assigned readings, and discussion questions. Concepts: laboratory skills and protocols for collecting and analyzing data Competencies: Students will use quantitative skills to 1) collect data using the tools of the discipline and 2) analyze the data. Assessment Methods: This outcome will be assessed across several different laboratories the student takes. Measures: Direct measures include Instructor grading of lab reports. Indirect measures will include student self-assessments via surveys and reflections Learning Outcome #3: Communicate knowledge, ideas, and reasoning clearly, effectively, and objectively in written and oral forms (Communication Skills).

To be used once the preliminary proposal has been approved.

Concepts: communicate effectively, reason clearly, write and communicate objectively

Competencies: Students will demonstrate their knowledge through oral and written work

Assessment Methods: This outcome will be assessed using oral presentations and/or written papers in the capstone course

Measures: Direct measures include instructor grading of written and oral work. Indirect measures will include student self-assessments via surveys and reflections

Learning Outcome #4: Interpret data using scientific reasoning and foundational disciplinary knowledge through project-based activities and/or research projects (Scientific Reasoning and Research).

Concepts: basic experimental manipulations, analysis of data, implications of the experimental outcomes

Competencies: Students will demonstrate their ability to apply experimental methods and interpret data.

Assessment Methods: This outcome will be assessed in participation in online discussions, exams, lab reports, and discussion questions.

Measures: Direct measures include evaluation of student written work, project-based activities, or research projects. Indirect measures will include student self-assessments via surveys and reflections

Learning Outcome #5: Demonstrate teamwork skills by collaborating and participating with peers to produce various deliverables (e.g., data collection, data analysis, conclusions) (Teamwork).

Concepts: collaborative work, mutual respect, and shared values.

Competencies: Students will demonstrate the ability to work effectively in virtual teams by demonstrating mastery of professional skills including content knowledge, self-reflection, project-management, and teamwork.

Assessment Methods: This outcome will be assessed in classroom interaction, homework, or group projects.

Measures: Direct measures include grades of student contribution to a project. Indirect measures will include student self-assessments via surveys and reflections

Assessment Measure	Source(s) of Evidence	Data Collection Point(s)
Job Placement Statistics	Student/Alumni Survey	At graduation annually (senior exit survey)
SCI 401 Senior Capstone	Percentage of students meeting the acceptable target for each learning objective measured using class assignments, reflections, presentations, and reports	Annually
Senior Exit Survey (will measure percentage of students rating each learning outcome at "Agree" or "Strongly Agree"	Student Survey	At graduation annually

Number of Students 30 60 90 120 150 Evidence of Market Demand: The data are from a Lightcast Q3 2022 Data Set provided by AZ Online and a Burning Glass report provided by Curricular Affairs. For students based in the U.S., the marketing report for CIP code 30.010 lists job growth expected over 10 years ranging from 3.89% biological technicians) to 40.85% (medical and health services managers) with job growth expected for secondary school teachers 13.49%), medical assistants (21.14%), Industrial Production managers (11.17%) and natural sciences managers (5.14%) also. Additionally, Arizona Global, who will eventually be added as a campus has expressed market demand for this degree. Similar Programs Offered at Arizona Public Universities: The University of Arizona offers the following degrees with some similarity to the propos 3A in Science: the 1) Bachelor of Interdisciplinary Studies—Emphasis in Science, Technology, Health and Society, 2) BA in Applied Humanities— Public Health. The main similarity with the Bachelor of Interdisciplinary Studies—Emphasis in Science, Fechnology, Health and Society and the proposed BA is that both degrees provide students with STEM instruction. The main differences are that tudents in the proposed BA take M-strand moderate math requiring precalculus whereas the BIS only requires G-strand general math. Additionally, students in the proposed BA obtain more extensive instruction in science through 100- and 200-level requirements and upper electives in science. The BAs in Applied Humanities also only require G-strand math and further require no science courses. New Academic Program Budget Projection Form Justification

The program funding projection for the BA in Science includes three years of budget projection information related to the new major.

Metrics

We calculated the total number of SCH and enrollments (majors) we expect the program to generate each year for the college reflecting a net increase to the college. We also considered students transferring in from community colleges and SCH or enrollment within the college for students who might transfer to the new major. Our formulas per year reflect projected increases in the AIB model provided by the university.

As all courses are already delivered online. We do not anticipate needing to hire additional Faculty FTE needed for the major given minimal impact on any one course given the flexibility for course choice and the many courses available to students.

Funding Sources

Funding sources related to SCH and enrollments stem from the net new activity described in the metrics section above. No one-time funds are needed or funds from Reallocation of existing sources or Other Items sources.

No Institutional Strategic Investment funds are needed.

Expenditure Items

We budget the cost of an advisor to provide support for students and a program manager to administer the program factoring in annual raises. No other marginal costs, GA Assistantships or other expenditures related to the new program are expected (see information above).

	from any of the STEM	courses in the Science,	public health, and medical	education and health
	areas. Students will	Technology, Health, and	ethics.	promotion, health
	gain breadth and	Society track.		disparities, and world food
	depth in areas of			and health.
	science of their			
	choosing ranging from			
	neuroscience, earth			
	systems and			
	sustainability, and			

	genetics, cell, and molecular biology, and more.			
Target Careers	K-12 education, policy, law, medical and health services managers, medical assistants, natural sciences managers, entry level research technicians	Careers in research, information technology, the biotechnology industry, municipal development, and others	Medical assistants, medical technicians, medical and health service managers, careers in the health sciences	Careers in public health
Emphases? (Yes/No) List, if applicable	No	No	No	No
Minimum # of units required	120	120	120	120
Level of Math required (if applicable)	M-Strand (Moderate): Requires Precalculus and statistics	G-Strand (general knowledge)	G-Strand (general knowledge)	G-Strand (general knowledge)
Level of Second Language required (if applicable)	4 th semester proficiency	4 th semester proficiency	4 th semester proficiency	4 th semester proficiency
Pre-Major? (Yes/No) If yes, provide requirements.	No	No	No	No
Special requirements to declare/gain admission? (i.e. pre-requisites, GPA, application, etc.)	2.0 GPA	2.0 GPA	2.0 GPA	2.0 GPA
Internship, practicum, or applied/experiential requirements? If yes, describe.	No	No	No	No

Additional questions:

1. How does the proposed program align with peer programs? Briefly summarize the similarities between the proposed program and peers, which could include curriculum, overall themes, faculty expertise, intended audience, etc.

The main similarity with the Bachelor of Interdisciplinary Studies—Emphasis in Science, Technology, Health and Society and the proposed BA is that both degrees provide students with STEM instruction. The proposed degree shares less similarity with the other two degrees.

2. How does the proposed program stand out or differ from peer programs? Briefly summarize the differences between the proposed program and peers, which could include curriculum, overall themes, faculty expertise, intended audience, etc.

The main differences in the proposed and existing degrees are that students in the proposed BA take M-strand moderate math requiring precalculus whereas the BIS only requires G-strand general math as do the Bachelors in the Applied Humanities. Additionally, students in the proposed BA obtain more extensive instruction in science through 100- and 200-level requirements and upper electives in science. The BAs in Applied Humanities also only require G-strand math and do not require science courses.

3. How do these differences make this program more applicable to the target student population and/or a better fit for the University of Arizona?

This degree in leaving 25-50 elective units open will allow maximum flexibility for students pursuing degrees that require knowledge of science, but do not require students to conduct science (e.g., education, law, journalism, business, economics, humanities, etc.) adding value to such degrees so that students are better prepared to apply their knowledge to the challenges of today.

Dear Doug, Lee, Joyce, Mike, Craig, Konrad, Chris, and Mary,

I am writing to obtain your approval to use the courses listed below from your departments in the proposed BS and BA in Science. The degrees will be offered in the online campus. Please respond to this email message and copy all. Please contact me directly on a different email thread with any questions.

Rebecca

-Math 122A (3) Functions of Calculus & Math 122B (3) First semester Calculus -Math 125 (3) Calculus -Math 113 (3) Elements of Calculus

Statistics Requirement. (3 units) Complete 1 of the following: -Math 163 or 263 (3) Basic Statistics or Intro to Statistics and Biostatistics -PSY 230 (3) Psychological Measurement and Statistics

Core Science Requirement. (16 units) Complete 4 of the following (complete at least one course from each of biology, chemistry, and physics):

-MCB 181 R/L (4) Introductory Biology I with lab -ECOL 182 R/L (4) Introductory Biology 2 with lab

-CHEM 141 & 145 (4) General Chemistry 1: Quantitative Approach with lab -CHEM 142 & 146 (4) General Chemistry 2: Quantitative Approach with lab

-PHYS 102 & 181 (4) Introductory Physics 1 with lab -PHYS 103 & 182 (4) Introductory Physics 2 with lab

Or

-PHYS 141 (4) Introductory Mechanics

-PHYS 241 (4) Introductory Electricity and Magnetism

-PHYS 242 (4) Introductory Relativity and Quantum Mechanics

Additional Science Requirement (7 units). Complete 2 of the following:

-NSCS 200 (3) Fundamentals of Neuroscience & Cognitive Science -PSY 101 (4) Introduction to Psychology

Capstone Requirement (1 unit)

-SCI 401 (1) Science Capstone

Upper division electives (24 units)

Students take at least 4 courses in one area and the remaining 4 courses from any of those listed below for a total of 8 upper division electives. Example areas are listed below. An area may also be a grouping of classes from a single STEM department.

Psychology

-PSY 300 (3) Cognitive Neuroscience: A Guide to Mind and Brain

-PSY 340 (3) Introduction to Cognitive Development

-PSY 352 (3) Personality

 -PSY 360 (3) Social Psychology -PSY 381 (3) Abnormal Psychology -PSY 383 (3) Health Psychology -PSY 324 (3) Fundamentals of Aging -PSY 412 (3) Animal Learning -PSY 480 (3) Forensic Psychology

Subject: Approval for courses used in the proposed BA/BS in Science

Dear Doug, Lee, Joyce, Mike, Craig, Konrad, Chris, and Mary,

I am writing to obtain your approval to use the courses listed below from your departments in the proposed BS and BA in Science. The degrees will be offered in the online campus. Please respond to this email message and copy all. Please contact me directly on a different email thread with any questions.

Rebecca

-Math 122A (3) Functions of Calculus & Math 122B (3) First semester Calculus

-Math 125 (3) Calculus -Math 113 (3) Elements of Calculus

Statistics Requirement. (3 units) Complete 1 of the following:

-Math 163 or 263 (3) Basic Statistics or Intro to Statistics and Biostatistics -PSY 230 (3) Psychological Measurement and Statistics

Core Science Requirement. (16 units) Complete 4 of the following (complete at least one course from each of biology, chemistry, and physics):

-MCB 181 R/L (4) Introductory Biology I with lab -ECOL 182 R/L (4) Introductory Biology 2 with lab

-CHEM 141 & 145 (4) General Chemistry 1: Quantitative Approach with lab -CHEM 142 & 146 (4) General Chemistry 2: Quantitative Approach with lab

-PHYS 102 & 181 (4) Introductory Physics 1 with lab -PHYS 103 & 182 (4) Introductory Physics 2 with lab

Or

-PHYS 141 (4) Introductory Mechanics

-PHYS 241 (4) Introductory Electricity and Magnetism

-PHYS 242 (4) Introductory Relativity and Quantum Mechanics

Additional Science Requirement (7 units). Complete 2 of the following: -NSCS 200 (3) Fundamentals of Neuroscience & Cognitive Science -PSY 101 (4) Introduction to Psychology

Capstone Requirement (1 unit)

-SCI 401 (1) Science Capstone

Upper division electives (24 units)

Students take at least 4 courses in one area and the remaining 4 courses from any of those listed below for a total of 8 upper division electives. Example areas are listed below. An area may also be a grouping of classes from a single STEM department.

Psychology

-PSY 300 (3) Cognitive Neuroscience: A Guide to Mind and Brain

-PSY 340 (3) Introduction to Cognitive Development

-PSY 352 (3) Personality

-PSY 360 (3) Social Psychology

-PSY 381 (3) Abnormal Psychology

-PSY 383 (3) Health Psychology

-PSY 324 (3) Fundamentals of Aging

- -PSY 412 (3) Animal Learning
- -PSY 480 (3) Forensic Psychology

Earth Systems and Sustainability

-ATMO 336 (3) Weather, Climate, and Society

-HWRS 349A (3) Principals of Hydrology

-HWRS 349B (3) Principals of Hydrology Lab

-ATMO 436A (3) Weather Fundamentals

Genetics, Cell, and Molecular Biology

-ECOL 320 (4) Genetics -ECOL 326 (3) Genomics -MCB 404 (3) Bioethics -MCB 410 (3) Cell Biology -MCB 411 (3) Molecular Biology -MCB 422 (3) Problem Solving with Genetic Tools

Ecology, Evolution, and Animal Behavior

-ECOL 406R (3) Conservation Biology

-ECOL 437 (4) Vertebrate Physiology

-ECOL 485 (4) Mammalogy

-ECOL 487R (3) Animal Behavior

-ECOL 487L (1) Animal Behavior Lab

-ECOL 488 (4) Arizona Mammals

Biochemistry

~CHEM 241A (3) Organic Chemistry Lecture I -CHEM 241B (3) Organic Chemistry Lecture 2 -BIOC 384 (3) Foundations in Biochemistry

-BIOC 385 (3) Metabolic Biochemistry

(~required for the remaining 3 courses in this grouping)

Neuroscience

*NROS 307 (3) Cellular Neurophysiology

*NROS 310 (3) Molecular and Cellular Biology of Neurons

*NROS 418 (3) Fundamental Principles of systems Neuroscience

-NROS 308 (3) Methods in Neuroscience

-NROS 330 (3) Principles of Neuroanatomy: Cells to Systems

-NROS 430 (3) Neurogenetics

-NROS 440 (3) How to build a Brain: Mechanisms of Neural Development (*recommended courses)

Cognitive Science

-NSCS 320 (3) Issues and Themes in Cognitive Science

-CGSC 344 (3) Modeling the Mind: Computational Models of Cognition

-CGSC 310 (3) Multisensory Perception

-PSY 300 (3) Cognitive Neuroscience: A Guide to Mind and Brain (note: students may count this course toward one grouping only)

Subject: FW: Approval for courses used in the proposed BA/BS in Science

Dear Sumit, I apologize that I did not include you in the original request below. Can you approve use of introductory physics courses in the proposed BA and BS in Science?

Thank you,

Rebecca Gómez, PhD (She/Her/Ella)

Associate Dean for Undergraduate Student Success College of Science Professor of Psychology and Cognitive Science Gould-Simpson 1025 PO Box 210077 | Tucson, AZ 85721 <u>rgomez@arizona.edu</u>

Subject: Approval for courses used in the proposed BA/BS in Science

Dear Doug, Lee, Joyce, Mike, Craig, Konrad, Chris, and Mary,

I am writing to obtain your approval to use the courses listed below from your departments in the proposed

BS and BA in Science. The degrees will be offered in the online campus. Please respond to this email message and copy all. Please contact me directly on a different email thread with any questions.

Rebecca

-Math 122A (3) Functions of Calculus & Math 122B (3) First semester Calculus -Math 125 (3) Calculus -Math 113 (3) Elements of Calculus

Statistics Requirement. (3 units) Complete 1 of the following:

-Math 163 or 263 (3) Basic Statistics or Intro to Statistics and Biostatistics -PSY 230 (3) Psychological Measurement and Statistics

Core Science Requirement. (16 units) Complete 4 of the following (complete at least one course from each of biology, chemistry, and physics):

-MCB 181 R/L (4) Introductory Biology I with lab -ECOL 182 R/L (4) Introductory Biology 2 with lab

-CHEM 141 & 145 (4) General Chemistry 1: Quantitative Approach with lab -CHEM 142 & 146 (4) General Chemistry 2: Quantitative Approach with lab

-PHYS 102 & 181 (4) Introductory Physics 1 with lab -PHYS 103 & 182 (4) Introductory Physics 2 with lab

Or

-PHYS 141 (4) Introductory Mechanics

-PHYS 241 (4) Introductory Electricity and Magnetism

-PHYS 242 (4) Introductory Relativity and Quantum Mechanics

Additional Science Requirement (7 units). Complete 2 of the following:

-NSCS 200 (3) Fundamentals of Neuroscience & Cognitive Science -PSY 101 (4) Introduction to Psychology

Capstone Requirement (1 unit)

-SCI 401 (1) Science Capstone

Upper division electives (24 units)

Students take at least 4 courses in one area and the remaining 4 courses from any of those listed below for a total of 8 upper division electives. Example areas are listed below. An area may also be a grouping of classes from a single STEM department.

Psychology

-PSY 300 (3) Cognitive Neuroscience: A Guide to Mind and Brain
-PSY 340 (3) Introduction to Cognitive Development
-PSY 352 (3) Personality
-PSY 360 (3) Social Psychology
-PSY 381 (3) Abnormal Psychology
-PSY 383 (3) Health Psychology
-PSY 324 (3) Fundamentals of Aging
-PSY 412 (3) Animal Learning
-PSY 480 (3) Forensic Psychology

Earth Systems and Sustainability

-ATMO 336 (3) Weather, Climate, and Society -HWRS 349A (3) Principals of Hydrology -HWRS 349B (3) Principals of Hydrology Lab -ATMO 436A (3) Weather Fundamentals

Genetics, Cell, and Molecular Biology

-ECOL 320 (4) Genetics -ECOL 326 (3) Genomics -MCB 404 (3) Bioethics -MCB 410 (3) Cell Biology -MCB 411 (3) Molecular Biology -MCB 422 (3) Problem Solving with Genetic Tools

Ecology, Evolution, and Animal Behavior

-ECOL 406R (3) Conservation Biology -ECOL 437 (4) Vertebrate Physiology -ECOL 485 (4) Mammalogy -ECOL 487R (3) Animal Behavior -ECOL 487L (1) Animal Behavior Lab -ECOL 488 (4) Arizona Mammals

Biochemistry

~CHEM 241A (3) Organic Chemistry Lecture I -CHEM 241B (3) Organic Chemistry Lecture 2 -BIOC 384 (3) Foundations in Biochemistry -BIOC 385 (3) Metabolic Biochemistry (~required for the remaining 3 courses in this grouping)

Neuroscience

*NROS 307 (3) Cellular Neurophysiology
*NROS 310 (3) Molecular and Cellular Biology of Neurons
*NROS 418 (3) Fundamental Principles of systems Neuroscience
-NROS 308 (3) Methods in Neuroscience
-NROS 330 (3) Principles of Neuroanatomy: Cells to Systems
-NROS 430 (3) Neurogenetics
-NROS 440 (3) How to build a Brain: Mechanisms of Neural Development (*recommended courses)

Cognitive Science

-NSCS 320 (3) Issues and Themes in Cognitive Science -CGSC 344 (3) Modeling the Mind: Computational Models of Cognition -CGSC 310 (3) Multisensory Perception -PSY 300 (3) Cognitive Neuroscience: A Guide to Mind and Brain (note: students may count this course toward one grouping only)

TO: UGC, U-CAAC

FROM: Rebecca Gómez, Associate Dean for Undergraduate Student Success, College of Science

CC: Carmala Garzione, Dean, College of Science

DATE: February 14, 2023

SUBJECT: U-CAAC requested changes to proposed BA and BS in Science

Students in the BA take 3 of 5 upper division courses in one area. Students in the BS take 4 of 7 upper division courses in one area. Different areas may have different prerequisites offered at the 100 and 200 level.

The U-CAAC subcommittee that reviewed the proposed BA and BS in Science raised a concern that students would have difficulty navigating the different concentration areas in the degrees.

The College of Science will address this concern by developing advising plans for each area to help guide students to the necessary prerequisites for their chosen area of focus and the additional courses they may or may not take outside their focus.

	Assessment Plan BA.docx

Dear Melanie,

Please see the email confirmation I received from Elaine. I would be happy to write a memo for her to sign that would provide more detailed information if the message below is insufficient either because it has so little information or because she only mentions the BA. If there are specific issues I need to highlight for UGC I'm happy to include those. This attachment specifically lists the assessment plan for the BA but I mention below that the assessment plan for the BS is identical. Please advise.

Dear Elaine,

I understand that I will need an email from you confirming that we worked together to develop an assessment plan for the proposed BA and BS in Science and that you approve of our direct and indirect measures. I am attaching information from the proposal to remind you how we plan to approach this. We are using the same learning objectives and approach for the BA and BS in Science.

Many thanks and I hope you are doing well,

Rebecca Gómez, PhD (She/Her/Ella)

Dear Elaine,

Thank you so much for your help with this and for the extra time it took for you to add course titles. This looks perfect. Thank you also for the help you provided on the table I will need to include in the additional information form for curricular affairs. I'll be in touch after approval so I can start work on the rest of the assessment process.
