

Undergraduate Council Report

UGC meeting date: 09/22/2026

For consideration at the Faculty Senate meeting on 09/28/2026

UGC reviewed the following proposals for **program disestablishment**:

1. BAS in Applied Computing (Information Science)
 - Curriculum is included in the new BS in Cyber Operations (approved for FA26)
 - Teach out plan: all current students will be taught out using the existing courses/curriculum
 - Students can stay in BAS or change their major to new BS Cyber Ops
2. Certificate in Advanced Systems and Industrial Engineering (Engineering)
 - Initiated in 2019 and never had enrollment; Beijing Agreement was cancelled
3. Minor in Community Innovation (CALES)
 - Low enrollment; no active students
4. Certificate in Agricultural Leadership and Innovation (CALES)
 - Low enrollment; no active students

Disestablishment #1 above has a clear teach out plan. Distestablishments #2–4 above do not have a teach out plan because these programs do not have active students.

The four disestablishments were thoroughly evaluated and discussed by the Academic Programs Subcommittee of UGC and presented to the full council as informational items. **UGC members raised no questions or concerns.**
